DENTURE TRY-IN APPROVAL

A critical step in the denture process is the tooth try-in appointment. The goal of this specific appointment is to gain your approval of a trial setup of the denture. However, the teeth themselves will be the actual teeth that will be in the definitive denture. We will not proceed with processing the definitive denture until you have given us your written approval to do so.

Once the denture has been processed, any changes will cost \$600. In order to provide you with most cosmetic denture possible, we request the following:

1. 3 pictures from a magazine that represent the look you desire. Please cut them out and bring them to you next appointment.
2. In addition, we would like you to bring a picture of yourself at a time in your life that you liked you smile. This picture should show your teeth in a smiling pose. This can be a formal portrait or a casual snap shot. Please bring this photograph to your next appointment.
3. We also request you bring a spouse, significant other or someone in your life that you value their opinion. At times, patients have given their enthusiastic approval only to have their spouse disappointed. If you decline this option, we will ask for a signed refusal.

I have been given the opportunity to read this document and ask questions. I give my approval to allow Dr. Pham to process my denture. I approve of the color, shape, size, and arrangement of teeth. I have been given the opportunity to see a photograph of my try-in. I understand that any changes made to the bridge after processing will carry additional charges. Re-processing fees may exceed \$1000.
